### (54) Title: SYSTEM AND METHOD FOR ADMINISTRATING ELECTRONIC DOCUMENTS

(57) Abstract: System for administrating at least one electronic document, the system comprising: a communication terminal (105) adapted for communication with a server (115) via a network (110), said server being adapted for communication with a database (120), wherein the electronic document comprises a first information entity and a second information entity, wherein the communication terminal (105) is arranged to display the first and the second information entity in dependence of each other and to provide information to the second information entity, wherein said communication terminal further is arranged to generate a third information entity comprising at least part of the first and second information entity and the provided information by converting means, wherein said communication terminal further is arranged to make the third information entity unique, and wherein said server is adapted to transmit at least a part of the unique third entity to a receiving unit (120; 130).
